# euromarc® ELITE

THIN  
CUTTING **901**

- Designed for speed and your budget.
- Ultra thin design with special quality inox grain and resin for smoother, faster cutting on all steels, including stainless.

# euromarc® ELITE

THIN  
CUTTING **911**

- Built to last the distance, quick cutting, longer lasting, fewer disc changes.
- A high-quality mix of aloxide and zirconia grain give you a smooth and quick cutting speed.
- Inox 100% contamination free.

# euromarc® ELITE

CUTTING **903**

- All rounder 2.8mm cutting disc for those heavier steel projects.
- Reduced flexibility with double reinforced backing suitable for all types of steel.

# euromarc® ELITE

CUTTING **905**

- All rounder 2.5mm cutting disc for those heavier steel projects.
- Reduced flexibility suitable for all types of steel.

# euromarc® ELITE

CUTTING **906**

- All rounder 2.8mm cutting disc for those heavier steel projects.
- Reduced flexibility with double reinforced backing suitable for all types of steel.

# euromarc® ELITE+

CUT AND  
GRIND **941**

- Save yourself time and money! Fast cutting and grinding with one disc.
- Quick and precise, removes less material and will leave a cleaner cut.
- Reinforced with three layers of fibre glass to comply with EN12413 safety standard for grinding.

# euromarc® ELITE+

ALUMINIUM  
CUTTING **917**

- Lubricates while cutting with no residue! Just fast clean cuts with no jamming or kick-back.
- Unlike other discs, the Aluminium Razor-Cut has specific abrasive properties that prevent contamination to aluminium.

# euromarc® ELITE+

RAZOR-HUB  
CUTTING **913**

- The depressed steel razor-hub is designed to create the straightest cutting disc possible by being larger than the clamping area of most grinders, eliminating warping.
- Inox 100% contamination free.

# euromarc® ELITE

DROPSAW  
CUTTING **909**

- Low-speed cut-off for safe, fast, straight cutting on mild and stainless steel.
- Precisely balanced for straight cutting.
- Inox and iron-free.
