

Biodegradability Statement

Here at Nuvik we're constantly innovating for the benefit of the environment and a sustainable future. That's why we're always working on new ways to cut down on packaging and waste.

To take this a step further our wipe technicians developed a cloth which is Biodegradable and still meets the rigorous demands of our products!

Where products are marketed as 100% Biodegradable, the fibres used in the manufacture of the cloth are inherently Biodegradable.

Our Nuvik BioCloth is manufactured using fibres which are:

100% Plant based
Plastic free
Bio Based
Sustainable

NOTE – Please dispose of Biodegradable wipes responsibly. They are not suitable for disposal in the sewer system or the recycling bin – they must be disposed of in the mixed waste bin.
