# Experience the Purple Advantage

## Say Goodbye to Clogs and Heat Build Up with Bora Abrasives!

### BORA9

#### BORA9 Ceramic Fibre Disc

##### 100% Ceramic Precision Shaped Grain:

- Aggressive, cool cutting and extended product life.

##### Specialised Top Coating:

- Purple 'Bora' formula reduces clogging, friction, and heat build-up.
- Evenly applied top coating exposes a large surface of the grain for superior performance.

##### Superior Backing:

- Thicker fibre backing (36-60 grits) reduces heat build-up in heavy grinding.
- Customers observe four times the life compared to standard fibre sanding discs.

##### Operation:

- Ideal for steel, stainless steel, and aluminium applications.

25 pack  
100mm

\* Prices are starting from  
and may vary on grit.

### BORA7

#### RAP-LOCK BORA7 Ceramic Sanding Discs

##### 100% Ceramic for Fast Cutting:

- Maintains cool cutting on stainless even under pressure.

##### Advanced Top Coating:

- Purple 'Bora' formula ensures cooler cutting and less discoloration on workpieces.

##### Durable Polyester Backing:

- Quick-change like Roloc sanding discs.
- Easy half-twist locking system for fast changeovers

##### Operation:

- Suitable for grinding seams and spot welds, general machining of stainless steel, deburring casts, carbon steel, and ferrous metals.

### BORA1

#### BORA1 Ceramic PSA or Velcro Discs

##### Faster Sanding, Fewer Changes:

- New Ceramic grain provides faster and cooler cutting, increasing output and reducing disc changes.

##### Consistent Finish:

- Grain stays sharper by continually cracking, exposing new cutting edges.

##### Purple 'Bora' Formula Top Open Coating:

- Reduces clogging, friction, and heat build-up, maintaining sharpness.

##### Quality PE Film Backing:

- Minimizes the possibility of disc tearing during sanding corners and edges.
- Ideal for fast stock removal and finishing on stainless steel.

100pack  
150mm PSA

# Precision in Purple!

## Elevate your craftsmanship with Bora Abrasives

**BORA7**

### BORA7 Ceramic Finishing Belts

#### Special Ceramic Grain:

- Extreme density and sub-micron crystal structure for consistent cool cutting and extended life.

#### Purple 'Bora' Formula Top-Coat:

- Reduces clogging, friction, and heat build-up, extending belt life.

#### Stretch-Resistant Polyester Backing:

- Ensures a consistent removal rate.

#### Quality PE Film Backing:

- Suitable for dry grinding, deburring castings and forgings, refining, shaping, and general metalworking on stainless steel and high-temperature steel.

and may vary on grit.

'They're cost effective. Productivity's gone up, and they're doing the job of two previous discs.'

**Matt, Osprey Boats (Bora9)**

'Once you've used it for a week or two you'll soon see that it's definitely cutting down in labour costs. We just go straight from a variable speed grinder to 120/180, then go to 240, then basically we just go straight to a polishing process. It cuts a lot of time down with changing out discs. So I totally recommend it.'

**Shane Oldfield, Velvet Steel (Bora1)**

'The Bora 9 sanding discs have proven to be an excellent addition to my workshop. We exclusively use 115mm grinders and have now switched to using only the Bora 9 discs. The durability of these discs surpasses expectations. We use them on Steel, Aluminium, and Stainless surfaces, and they hold up exceptionally well. The main advantage of the Bora 9 discs is that we don't need to change them as frequently as other options. Using these discs, we always achieve the desired finish with confidence. The satisfaction of our customers speaks volumes about our craftsmanship. I have experimented (horsed-around) with other products in the past, but I cannot imagine working without the Bora 9 discs again. They truly are a game-changer for our workshop.'

# MIG Mastery Unleashed

Forge Superior Bonds with Binzel, Tweco, and Tregaskiss Style Torches!

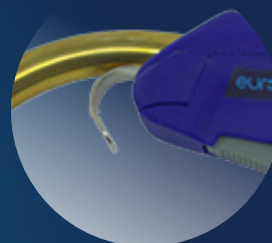

## Binzel Style Pro MIG Welding Torches

Our Binzel Style Pro MIG Welding Torches offer unparalleled welding precision and performance. Engineered with ergonomic Pro-style systems, these air and water-cooled torches maximize comfort, grip and balance, while ensuring enhanced wire feeding performance.

Compliant with EN60974-7 Standard, these torches are built to meet the highest industry standards.

Reliable 'Euro' connection compatible with most MIG welders

Large hanger hook for easy hanging and storage

Knuckle joint for freedom of movement

## WELDING TORCHES

### Binzel Style Pro 15 MIG Welding Torch

- Air cooled, 180A CO/150A Mixed Gas
- Designed for 0.8-1.0mm wire
- Ideal for light fabrication.

VMBAE15004

**\$129.00<sup>ea</sup>**

### Binzel Style Pro 24 MIG Welding Torch

- Air cooled, 250A CO/220A Mixed Gas
- Designed for 0.8-1.2mm wire
- Suitable for light-to-medium fabrication

VMBAE24004

**\$189.00<sup>ea</sup>**

### Binzel Style Pro 25 MIG Welding Torch

- Air cooled, 230A CO/200A Mixed Gas
- Designed for 0.8-1.2mm wire
- Ideal for light-to-medium fabrication

VMBAE25004

**\$179.00<sup>ea</sup>**

## Binzel Style Pro 36 MIG Welding Torch

- Air cooled, 300A CO/270A Mixed Gas
- Designed for 0.8-1.2mm wire
- Suitable for medium-to-heavy fabrication
- Available in 4 or 5mm lead

VMBAE36004 – 4m

**\$239.00<sup>ea</sup>**

VMBAE36005 – 5m

**\$259.00<sup>ea</sup>**

## Binzel Style Pro 501 MIG Welding Torch

- Water cooled, 520A CO/430A Mixed Gas
- Designed for 0.8-1.2mm wire
- Ideal for heavy fabrication
- Available in 4 or 5mm lead

VMBAE50104 – 4m

VMBAE50105 – 5m

**\$389.00<sup>ea</sup>**

## Tweco Style Classic No.4 MIG Welding Torch

Explore welding excellence with our Tweco Style heavy duty MIG gun – a powerhouse engineered for unparalleled performance and lasting durability.

Boasting a maximum capacity of 400 amps, this air-cooled torch is tailor-made for medium-to-heavy fabrication, accommodating 0.8-1.2mm wire with precision.

The Tweco Classic heavy duty style MIG gun features a classic design enhanced with innovation, providing optimal weight, balance, and wire feeding performance.

- Large hanger hook for convenient storage
- Knuckle joint for freedom of movement
- Reliable 'Euro' connection compatible with most MIG welders

This torch is a must-have for professionals. Available in a 4.6m (15F) lead, it not only meets but exceeds industry standards, complying with the EN60974-7 Standard for your peace of mind.

VMWAE40046

**\$339.00<sup>ea</sup>**

## Tregaskiss Style Classic 400 MIG Welding Torch

Experience unmatched performance with our Tregaskiss Style heavy duty MIG welding torch – meticulously crafted for exceptional durability and precision.

With a robust design capable of handling a maximum of 400 amps, this air-cooled torch is the go-to solution for medium-to-heavy fabrication, accommodating wire sizes ranging from 1.0 to 1.6mm.

The Tregaskiss heavy duty style MIG welding torch combines classic design with innovative features, ensuring optimal weight, balance, and enhanced wire feeding performance.

Equipped with a knuckle joint for unhindered movement, this torch is the epitome of user-friendly design.

The 'Euro' connection ensures compatibility with most MIG welders, while the included 4.6m (15F) lead provides versatility in your welding tasks.

Compliant with the EN60974-7 Standard, this torch sets a new standard for performance and reliability in the welding industry.

our April/May flyer  
for more details

# Drill with Precision

• These professional-grade HSS-ground bright silver jobber drills are meticulously crafted for high performance, boasting a self-centring 135° split point that ensures easy and efficient drilling in all metals.

• The bright silver finish adds a touch of excellence, making them ideal for general-purpose applications in mild steel, cast steel, aluminium and stainless steel.

• The self-centring design, coupled with the HSS DIN388 fully ground material, not only increases drill life but also reduces wandering, providing clean and faster cutting with less pressure.

Available in metric or imperial sizing, these drills come in convenient packaging options to suit your preferences.

## Choose ELITE 502 for drilling perfection

### Packaging Options:

#### Individual Drills:

- Metric Sizes 1 - 8.4mm come in a pack of 10.
- Metric Sizes 8.5 - 13mm come in a pack of 5.
- Imperial Sizes 1/64 - 24/64" come in packs of 10.
- Imperial Sizes 13/32" - 1/2" come in packs of 5.

#### ELITE JOBBER DRILL SET 502::

- Available in 25-piece set with sizes ranging from 1-13mm (0.5mm rises).
- 29-piece set with sizes ranging from 1/16" to 1/2" (rises of 1/64").

- High performance, M2 temperature hardened material increases drill life.
- Self-centring 135° split point, to help penetrate with less pressure into the steel, and reduces wandering to give you clean, fast cutting.
- Bright finish for general purpose applications, hand and machine, for mild, cast steels, aluminium, and stainless steel.
- Standard: DIN338.

## Packaging

- 1.0 - 8.0mm = 10Pcs/pack
- 8.5 - 13.0mm = 5Pcs/pack

**Also available in imperial.**

# euromarc® ELITE

JOBBER  
DRILL  
**507**

**130° split point** for faster and more precise drilling. Penetrates on contact, and minimises wandering.

**Gold tungsten hi-molybdenum tool steel** and heat treatment for extra wear.

**Black oxide** flutes to help hold lubrication.

**Special cutting lip** on fluting, for fast removal.

3 flats on the shank means no slipping in the chuck or slide it a little deeper into the chuck to use the round part of the shank.

- Highest performance and extra wear resistant due to the gold tungsten hi-molybdenum tool steel, a special heat treatment, and black oxide finish to help hold the lubrication on the drill.
- 5-13mm with flat shank (1-4.9 standard shank).
- Drills suitable for all hand and machine, for mild, cast steels, aluminium, and stainless steel.

# Choose PEERLESS LLG Grease for Superior Lubrication in Extreme Conditions!

## PEERLESS LLG Grease

- Long life under high temperature for lasting equipment protection.
- Outlasts competitive premium multi-application greases at high temperatures.
- Extended protection under severe conditions compared to leading competitive products.
- Excellent water resistance, reducing maintenance costs in wet environments.
- Superior water washout resistance for consistent performance in wet and marine applications.
- Maintains consistency after absorbing water, lengthening lubrication intervals.
- High mechanical stability in severe operating conditions, lowering maintenance costs.

Reduces bearing wear and extends equipment life. Reduce maintenance costs, extend equipment life, and ensure peak performance with PEERLESS LLG – the grease that defies limits.

OGPLLLG400

**\$18.97<sup>ea</sup>**

Pack of 10  
**\$15.85<sup>ea</sup>**

'I would encourage our workshop to prioritize the use of PEERLESS whenever feasible. It is really a HERO product capable of functioning even after being wiped clean with a cloth.'

*- Behnam, Project Engineer  
Grayson Engineering (2015) Ltd*

## Also Available with GREASOMATIC Automatic Lubricator:

Enhance convenience and efficiency with the optional GREASOMATIC automatic lubricator, ensuring consistent and controlled application of PEERLESS LLG Grease for optimal equipment performance.

OGGMPERLLG

**\$63.49<sup>ea</sup>**

# PRECISION XL EP2

## Engineered for Endurance, Crafted for Performance!

Specially formulated for heavy-duty and general-purpose bearings, this grease excels in both low and high-speed applications. With a temperature operating range of -20°C to 160°C, PRECISION XL EP2 is your go-to solution for extreme conditions, providing outstanding oxidation stability, water resistance, and rust protection.

Outperforming competitors, PRECISION XL EP2 lasts 2-3 times longer, reducing re-greasing frequency, lowering operating costs, and extending equipment life.

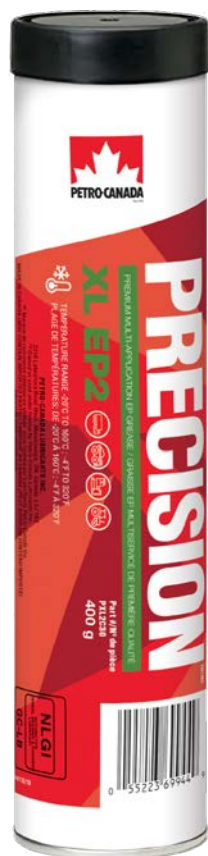

- Long life under high temperature for lasting equipment protection.
- Outlasts leading competitive products by 2-3 times in the ASTM D3527 life performance test.
- High mechanical stability in severe operating conditions.
- Reduces maintenance costs with reduced breakdowns under low to moderately high shear conditions.
- Excellent oxidation resistance for longer product life.
- Exceptional lubricating film performance over increasing heavy loads.
- Provides excellent corrosion protection for copper components.
- Resists leakage, dripping, and throw-off.
- Maintains consistency during service.

OGPXL20400

longer

# Safeguard Your Gears

## Discover ENDURATEX EP Oils for Long-Lasting Industrial Performance!

Experience sustained industrial gear protection with ENDURATEX EP Gear Oils – the key to long-life, anti-wear, and extreme pressure defence for your gear drives and bearings.

Available in a range of ISO viscosity grades, these oils are designed to reduce operating and maintenance costs by extending oil life and withstanding high operating temperatures.

Offering exceptional film strength and extreme pressure properties, ENDURATEX EP prevents seizure, scuffing, and spalling of gear teeth and bearing surfaces under shock-loaded conditions. Protect your equipment from rust, corrosion, and water damage with ENDURATEX EP Oils – the trusted choice for industrial gear drives in diverse applications.

- Exceptional long life for reduced operating and maintenance costs.
- Excellent film strength and extreme pressure properties for reduced wear and longer equipment life.
- Protects against rust and corrosion, extending equipment life.
- Excellent water separability prevents emulsion formation and eliminates corrosive damage.
- Low foaming tendency ensures continuous lubricant film presence.
- Versatile application in all types of enclosed industrial gear drives and heavy or shock-loaded bearings.
- Approved by many manufacturers of industrial gear drives.

Viscosity: 100, 150, 220, 320, 460, 680  
Size: 20L, 205L.

# TECMEN G Range

Breathe Easy, Work Safe -  
Unmatched Respiratory  
and Head Protection!

## RESPIRATORY AND HEAD PROTECTION

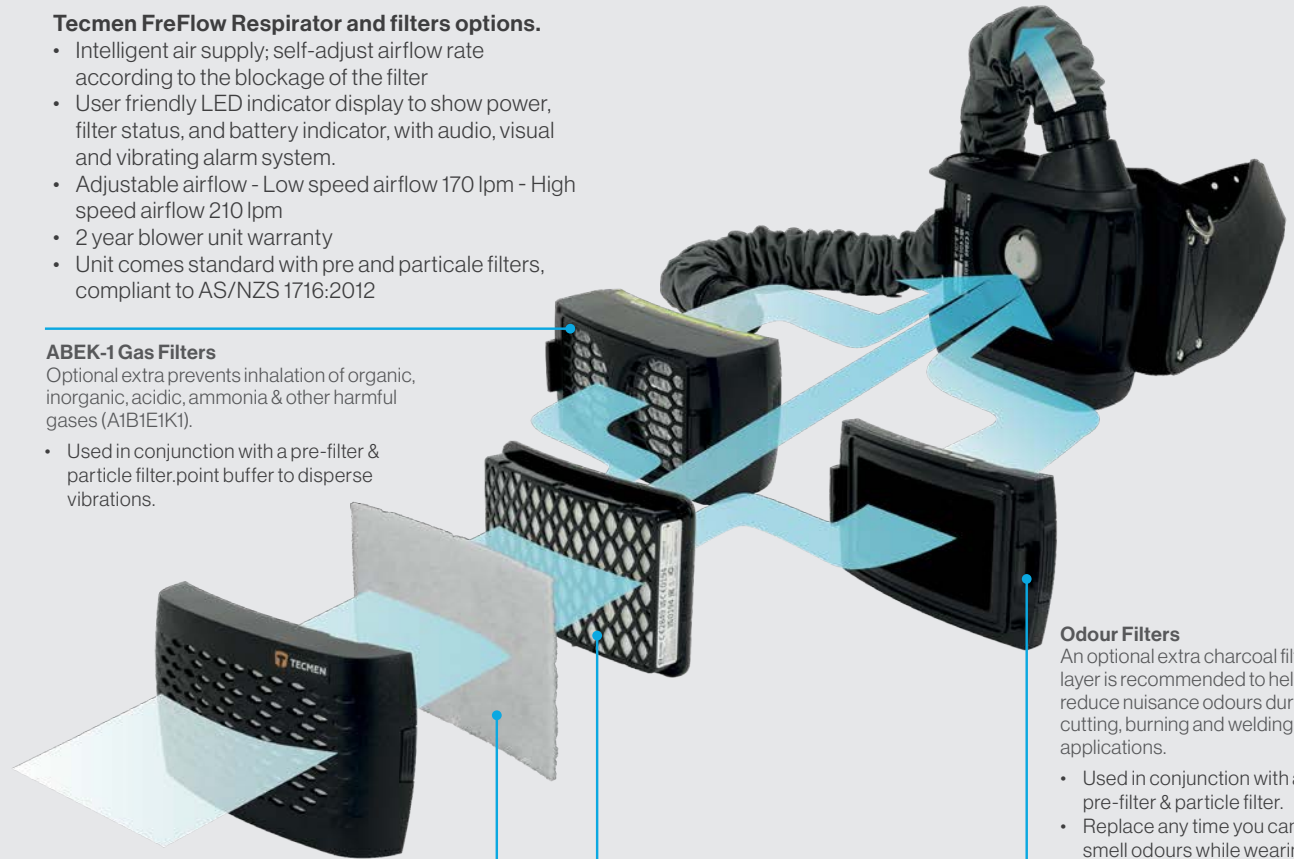

### Tecmen FreFlow Respirator and filters options.

- Intelligent air supply; self-adjust airflow rate according to the blockage of the filter
- User friendly LED indicator display to show power, filter status, and battery indicator, with audio, visual and vibrating alarm system.
- Adjustable airflow - Low speed airflow 170 lpm - High speed airflow 210 lpm
- 2 year blower unit warranty
- Unit comes standard with pre and particale filters, compliant to AS/NZS 1716:2012

### ABEK-1 Gas Filters

Optional extra prevents inhalation of organic, inorganic, acidic, ammonia & other harmful gases (A1B1E1K1).

- Used in conjunction with a pre-filter & particle filter, point buffer to disperse vibrations.

### Pre-Filters

For filtering large particles & to extend the life of the P3 Main filter.

### Particle Filters (P3)

Provide the highest level of welding, dust, and grinding particle protection (99.97%),

- Compliant to AS/NZS 1716:2012.
- Used in conjunction with a pre-filter\*

### Odour Filters

An optional extra charcoal filter layer is recommended to help to reduce nuisance odours during cutting, burning and welding applications.

- Used in conjunction with a pre-filter & particle filter.
- Replace any time you can smell odours while wearing the respirator.

**TECMEN G20 HARD  
HAT FACE SHIELD  
HELMET ONLY**

**\$488.00ea**

**So Quick. So Easy 14**

**Multipoint buffer**  
To disperse vibrations.

**Light weight design**  
Helmet weight is 660g

**Bump Cap Head protection**  
Blended engineering plastics with both rigidity and toughness. Compliant to EN812:2012.

**Flip-up design**  
Easily flip-up the face shield.

**Simple to operate**  
One button control on/off and adjust airflow.

**Air hose**  
Connecting to helmet, comes with flame retardant cover.

**Audio-visual and vibrating alarm**  
Indicates when battery charge and/or filter replacement is required.

**P3 filter**  
Compliant to AS/NZS1716:2012

**2 Year Warranty**  
on blower unit.

**Intelligent air supply**  
Self-adjust airflow rate according to the blockage of the filter.  
Low speed 170lpm / high speed 210lpm

**Rechargeable Li-ion battery**  
1 hour quick charge gives up to 9 hours of uninterrupted air-flow, with the best warranty in the market. 1 year warranty.

**Large impact resistant face shield**  
Provides unobstructed vision with no distortion and allows complete transmission of light while protecting the eyes and face from heat and debris.

Face shield impact rating  
Certified to EN166:2001 CE CatII  
3 - Splashes of liquids.  
9 - Molten metals and hot solids.  
High impact rating to AS/NZS1337

**Water resistant flame retardant face seal**  
With great sealing performance, ensuring that a micro-positive pressure state is formed in the face shield.

**Comfortable, 6 point adjustable head gear**  
Top of the headgear is adjustable in 6 positions, the rear is infinitely adjustable to suit a variety of head shapes.

**Heavy duty belt**  
Can also be worn with shoulder straps.
